

Don't panic

Don't call, close the screen!※

It's startling when the screen suddenly changes.
If that happens, take a breath and suspect **fraud**.

※How to close the browser (fake security warning screen)

- Press and hold the "ESC" key in the upper left corner of your keyboard, then click the "X" on your browser to close the screen.
- Press "Ctrl" + "Alt" + "Delete" simultaneously to launch the Task Manager, select the browser you are using, right-click, and select "End task."
